

**Safeguarding Taiwan's  
autonomy to ensure peace and  
prosperity in North East Asia**

conflict resolution committee

# Agenda

- 1.** Background information on the topic
- 2.** General problems
- 3.** Factors of the problems
- 4.** Solutions and their concern

# Background Information

- The difference of political and economic system between Taiwan and China

- Effects of the change in the political status of Taiwan
  - geographical location
  - economic impact
  - diplomatic relations

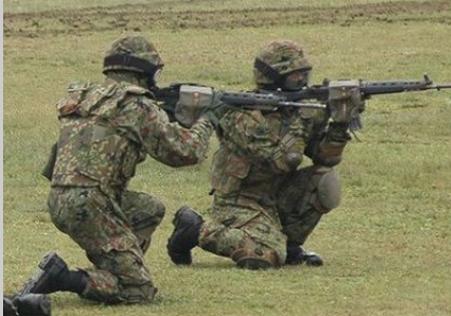

# General Problem

- Intensified relations between China and the US
  - the outbreak of cross-strait war
  - the end of the autonomy of Taiwan
- Unstability in the provision of resources to Japan
- The effects on the global supply of semiconductor chips and the global economy

# Factors

## 1. Taiwan depends on both the US and China

⇒ Diplomacy and military facilities → **the U.S.**, Economy → **China**

## 2. The defect of Japan to stand against China's economic and military influence

# Factors

3. The lack of natural resources in Japan

4. Recent aggression of Chinese armed force

The illegal fishery, sand craving and military investigation held by Chinese vessel

Taiwan's annual expense on homeland security increased

## **Solution 1: Build international alliances and make declarations to safeguard the Taiwan Strait**

- share the information
- develop weapons together
- do military joint exercises

**→ mobilization of the military power**

# Its concern

- China's anger
- the lack of tie between Japan and Taiwan

## **Solution 2: Build cooperation between Taiwan and Japan**

### **1.** Technological cooperation

The supply chain of IC is at stake in the potential military conflict and annexation between Taiwan and China, as there are production lines in China. Rearrangement of supply from China of IC can safeguard the supplies and maintain a relatively stable supply chain.

It is suggested that Taiwan and Japan can reallocate the supply chain to their own country to prevent political instability. This would also secure the stability of global IT industry.

## Its concern

### 2. Placemaking for the Taiwan purpose

In conjunction with the threat of Taiwan annexation, and initiation of planning satellite cities across the rural areas in Japan, the Japanese Government may try to fill in these new developed cities and boost the domestic economy of Japan by attracting immigrants from Taiwan. Whilst the Taiwanese can find a new shelter over there.

**Solution 3: Develop Taiwan's unique role  
as a key part of the  
Asia-Pacific Balance Chain**

## **3 aspects to be achieved**

- 1) Showcase Taiwan's uniqueness and individuality to the globe.
- 2) Prevent the rise of hackles in China.
- 3) Reach the balance of the influence of the US and China.

## **Taiwan's 3 unique advantages to balance China and America's political power as middle ground**

- 1.** Similarities in the political and economic systems with free countries
- 2.** Location which is important for geopolitic and strategic value in transportation relay
- 3.** Duality political states

# The channel between China and Free Countries

- Foster communication and cooperation between China and free countries (Global economic issues, Diplomatic issues)
- Showcase the advantage of Taiwan of fostering global prosperity by being an independent subject apart from China, and obviously that any military conflicts across the strait will be a great harm to both superpowers.
- Foster the formation of the middle area to balance both superpowers and secure the peace across the strait  
↓
- Lead to the investments ,cooperation and a seat in the global forum from both China and free countries ( America, Japan)

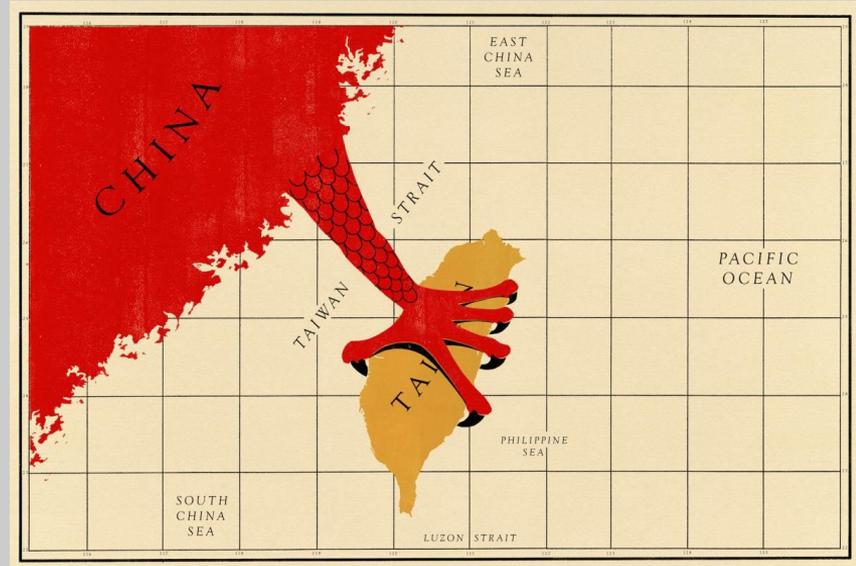

# Concern

Losing  
autonomy

# Concern

How to reduce  
the solid will to  
“take back”  
Taiwan?

# Concern

The two superpowers' dissatisfaction with the solution and their possible interference

The U.S. frustration with the rise of Japanese effect on IC industry

The U.S. and China's dissatisfaction with "balance" strategy

↓

Cause interference from the US and China

# Concern

## Security threat from Russia to the EU and the UN

Mobilizing their forces to defend Taiwan

Expose the weak point of their national defense to Russia and lead to a national security crisis.

The uncertainty of whether the EU and the UN are willing to join the declaration.
